

# **Advanced Data Structures and Algorithm Analysis**

## **Laboratory Projects**

## **Minimum Requirements on Project Report and Presentation**

# Title of Project Report

Author Names

Date: yyyy-mm-dd

## **Chapter 1: Introduction**

Problem description, purpose of this report, and (if any) background of the data structures and the algorithms. ***Be concise.***

## **Chapter 2: Data Structure / Algorithm Specification**

Description (pseudo-code preferred) of all the algorithms involved for solving the problem, including specifications of main data structures.

Or, if you are to introduce a new data structure and its related operations, do it in this chapter.

## **Chapter 3: Testing Results**

Table of test cases. Each test case usually consists of a brief description of the purpose of this case, the expected result, the actual behavior of your program, the possible cause of a bug if your program does not function as expected, and the current status (“*pass*”, or “*corrected*”, or “*pending*”).

## **Chapter 4: Analysis and Comments**

Analysis of the time and space complexities of the algorithms. Comments on comparing with other known data structures and algorithms. Further possible improvements.

## **Appendix: Source Code (if required)**

At least 30% of the lines must be commented. Otherwise the code will NOT be evaluated.

## **References**

List all the references here in the following format:

[1] Author, “Title of the article”, *Name of the journal*, page no., (year)

[2] Author, “Title of the book”, *Name of the publisher*, year

[3] Author, “Title of the article”, Web site links

## **Author List**

Specify ***who did what*** to show that particular contributors deserve to have their names printed in the cover page of your report.

## **Declaration**

*We hereby declare that all the work done in this project titled "XXX" is of our independent effort as a group.*

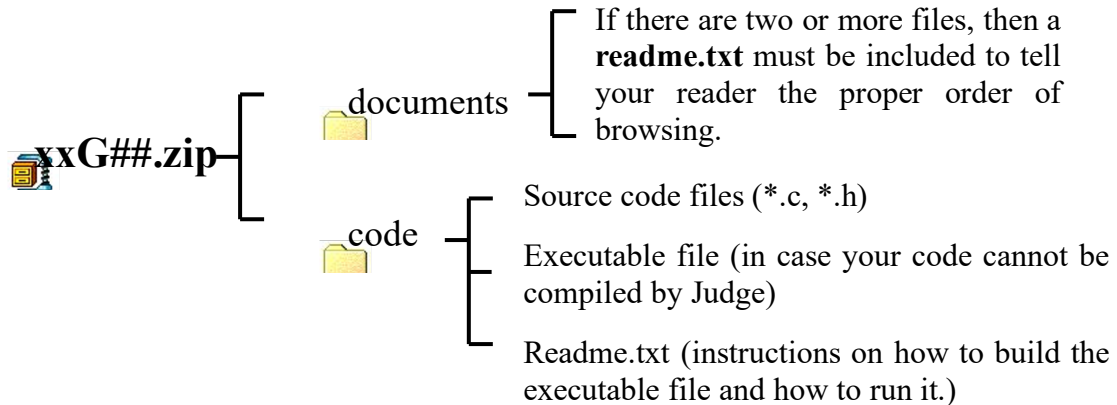

## **Signatures**

Each author must sign his/her name here.

Please keep in mind that these are the “minimum” requirements. Other requirements will be specified according to each project assignment.

# Hand-in

The zipped file must contain the following:

If no coding is required, you may ignore the “code” folder.

## Submit for Peer Review

For peer review you are supposed to submit your work through the online system at <https://pintia.cn/> with your *group leader's* personal account. ***Your names must NOT appear in any of your submitted documents. Any leak of group member identification (name, student ID, nickname, group number, file properties, etc) will be considered as a fraud, and as a consequence the group will be graded zero. Intentional disclosure of identity constitutes cheating.***

After the deadline of submitting your project, the peer review begins. Use your *group leader's* personal account to review your assignments. Your team must complete your review work before the deadline.

## Submit to your Teaching Assistant

The revised project reports are supposed to be submitted through the online system at <https://pintia.cn/> again with your group leader's personal account, in a *separate* problem set.

When submitting to TA, each group is supposed to hand in a zipped file. Your report document must be saved as a PDF file. The names of your report document and your source code file must be in the format ***Teacher\_2020G##\_ProjectNumber.\**** where ***##*** is the two-digit group number which will be given to you after your group is confirmed. For example, ***ljf\_2020G03\_P2.pdf*** is considered to be the report for Project 2 by Group 03, and the instructor is represented by “Liu Jinfei”.

## Late Penalty

Each assignment is due at 10:00pm on a specified date. The door for submission will be closed automatically afterwards.

For the final review, late assignments will have to be sent to your instructor/TA through email (e.g. Liu Jinfei's students are supposed to send email to TA via [mengyecheng@zju.edu.cn/lixiangzx@zju.edu.cn](mailto:mengyecheng@zju.edu.cn/lixiangzx@zju.edu.cn)). The assignments received between 10:01pm – 11:59pm on the day they are due will be penalized 5% of the points on that lab. After the due date, the penalty will be 10% for each day they are late.

## Presentation

The minimum contents of your presentation must include:

1. title of the project;
2. introduction of the problem;
3. the key data structures and algorithms involved to solve the problem;
4. testing results;
5. conclusions and comments.

Presentations will be given at the class meetings. The order of presentations will be decided randomly. The first team has at most 15 minutes while the other two have 10 minutes each. There will be a 5% penalty for exceeding the time limit. Please ***do not repeat*** what has been stated by the previous team(s). Concentrate on your unique point of view.

All the contributors must be present at the classroom 15 minutes earlier to have the computer ready and the speaker decided. Late penalty is 5% for each minute. The speaker who represents the team will be ***randomly*** chosen from all the contributors. A team member will be graded ***zero*** if he/she has no contribution to the team's project report or is absent from presentation without any acceptable reason.

If a team has to delay their presentation to another week, the late penalty will be 50% for each week they are late.
